DATA ANALYTICS COURSES.

I would like to create a wordpress website platform (using Elementor and Crocoblock, and probably Woocommerce in future) aiming to explain and teach DATA ANALYTICS. It would include content from data type, relational data base - SQL, Data Analysis (Data Wrangling, Exploratory Data Analysis - EDA, Data visualization, etc.), Descriptive Statistics, Inferential Statistics, Feature Engineering, Machine Learning Model (ML), Tuning ML, Evaluation of ML, Deployment of ML, Application of ML, Types of ML, Programming with Python, Manipulate MS EXCEL, Word for report, Power Point (for presentation), Tableau (data Visualization), etc.

This platform aims to have written tutorial content as well as video embedded (which I will create and publish on youtube).

In order to pursue this objective and build my platform, please could you provide me an organized and simple to follow guideline for this purpose. Also, this should be structured in a way that I could take advantage of crocoblock (jet engine) features for creating and managing custom taxonomies (like tags and categories) and displaying them using Listing Grid and other widgets

Additionally, since categories can have many subset or subfields e.g. within the Data Analysis category include EDA, which has its own subfields such cleaning, correlation, univariate data analysis, etc. Therefore, structure my platform content to allow users to select specific parts within EDA or other categories. In this way, I can take advantage of crocoblock search. If it helps, consider adding tags within categories.

Create it detailed as possible

DATA ANALYTICS COURSES. I would like to create a wordpress website platform (using Elementor and Crocoblock, and probably Woocommerce in future) aiming to explain and teach DATA ANALYTICS. It would include content from data type, relational data base - SQL, Data Analysis (Data Wrangling, Exploratory Data Analysis - EDA, Data visualization, etc.), Descriptive Statistics, Inferential Statistics, Feature Engineering, Machine Learning Model (ML), Tuning ML, Evaluation of ML, Deployment of ML, Application of ML, Types of ML, Programming

with Python, Manipulate MS EXCEL, Word for report, Power Point (for presentation), Tableau (data Visualization), etc. This platform aims to have written tutorial content as well as video embedded (which I will create and publish on youtube). In order to pursue this objective and build my platform, please could you provide me an organized and simple to follow guideline for this purpose. Also, this should be structured in a way that I could take advantage of crocoblock (jet engine) features for creating and managing custom taxonomies (like tags and categories) and displaying them using Listing Grid and other widgets. Additionally, since categories can have many subset or subfields e.g. within the Data Analysis category include EDA, which has its own subfields such as cleaning, correlation, univariate data analysis, etc. Therefore, structure my platform content to allow users to select specific parts within EDA or other categories. In this way, I can take advantage of crocoblock search. If it helps, consider adding tags within categories. Create it detailed as possible

ChatGPT said:

Absolutely! Below is a **detailed and structured guide** to build your **Data Analytics educational platform** using **WordPress, Elementor, and Crocoblock (JetEngine)**. The structure is designed to:

- Take full advantage of **custom post types, taxonomies, filters, and dynamic content** using Crocoblock.
- Allow **multi-level categorization and filtering** (e.g. EDA → Correlation, Cleaning, etc.).
- Be easily extendable with **WooCommerce** for future monetization.
- Integrate both **written tutorials** and **YouTube video content**.

✓ OVERVIEW

☐ Tools:

- **WordPress**
 - **Elementor Pro**
 - **Crocoblock JetEngine, JetSmartFilters, JetSearch**
 - (Optional for future) **WooCommerce, JetWooBuilder**
-

□ PHASE 1: STRUCTURE & CONTENT DESIGN

□ 1. CONTENT HIERARCHY DESIGN

You will use:

- **Custom Post Type (CPT):** Courses (or Tutorials)
- **Custom Taxonomies:**
 - **Main Category** (e.g. Data Analysis, Machine Learning, Programming)
 - **Subtopics** (e.g. EDA → Cleaning, Correlation, etc.)
 - **Tags** (skills, tools, formats)

✓**Example Hierarchy:**

Category	Subtopics	Tags
Data Analysis	EDA, Data Cleaning, Correlation, Data Wrangling, etc.	pandas, NumPy, Matplotlib
Machine Learning	Tuning, Evaluation, Deployment, Types (Supervised, etc.)	Scikit-learn, TensorFlow
Programming	Python (basic/advanced)	Loops, Functions, OOP
Software Tools	Excel, Tableau, Word, PowerPoint	Chart, Dashboard, Report
SQL	Joins, Queries, Subqueries, Aggregates	PostgreSQL, MySQL

□ PHASE 2: TECHNICAL IMPLEMENTATION

□ 2. SETUP CUSTOM POST TYPE

JetEngine → Post Types → Add New

- Name: Courses
- Slug: course
- Enable default fields: Title, Content, Featured Image

□ 3. ADD META FIELDS (JetEngine → Meta Boxes)

Attach to: Courses

Field Label	Type	Description
Short Description	Textarea	Appears in course preview
YouTube Video URL	Text	Embed video
Skill Level	Select	Beginner, Intermediate, Advanced
Estimated Time	Number	e.g. 30 (minutes)

Resource Download Media PDF, ZIP, etc.

External Link Text GitHub repo, Kaggle dataset, etc.

□ 4. CREATE CUSTOM TAXONOMIES

JetEngine → Taxonomies

A. Main Category (Hierarchical)

- Name: `Course Category`
- Slug: `course-category`
- Attach to: `Courses`
- Enable hierarchy (for subcategories)

Example:

markdown

CopyEdit

- `Data Analysis`
 - `EDA`
 - `Cleaning`
 - `Univariate`
 - `Correlation`
 - `Wrangling`
- `Machine Learning`

- Model Tuning
- Model Evaluation
- Deployment
- ML Types
 - Supervised
 - Unsupervised

B. Tags (Flat)

- Name: `Course Tags`
- Slug: `course-tags`
- Use for filtering by:
 - Tools (Python, Excel, SQL, etc.)
 - Concepts (pandas, joins, charts, etc.)

☐ PHASE 3: DESIGN WITH ELEMENTOR + JETENGINE

☐ 5. SINGLE COURSE TEMPLATE

JetEngine → Theme Builder → Add New → “Single Course”

Use these widgets:

- Dynamic Field (Title, Description)
- Dynamic Image (Featured image)
- Dynamic Repeater (for taxonomy terms)

- Video Embed (from YouTube URL)
- File download (if any)

□ 6. COURSE LISTING PAGE (All Courses)

Create a **Listing Template** (JetEngine → Listings → Add New)

- Source: **Courses**
- Display: Image, Title, Short Description, Categories, Tags
- Use **Grid or Masonry** layout

Add to a new page (e.g. **/courses**) with **Elementor** → **Listing Grid**

□ 7. FILTER SYSTEM (JetSmartFilters)

Add filters to Listing Grid:

Filter Type	Target	Description
Checkbox Filter	Course Category	Nested selection (e.g. EDA → Correlation)
Search	Title, Content	Full-text search
Select	Skill Level	Beginner, Advanced
Tags	Course Tags	Tool/skill-based filtering

Range Estimated Time Filter by duration

Sort Date/Title Ascending/Descending

Configure filters using:

- JetSmartFilters → Filter Presets
- Filter by taxonomy or meta field

☐ PHASE 4: CONTENT CREATION STRATEGY

☐ 8. SAMPLE CONTENT STRUCTURE

Create the following as sample entries to start:

Course Title	Category	Subtopic	Tags	Video
Introduction to EDA	Data Analysis > EDA	Univariate, Cleaning	pandas, Python	YouTube Embed
SQL Basics	SQL	Joins, Queries	PostgreSQL, SELECT	YouTube Embed
Model Evaluation	Machine Learning	Metrics	Accuracy, Precision, F1	YouTube Embed

Excel for Data
Entry

Software Tools

Formatting

Excel, Shortcuts

YouTube
Embed

Python Data
Structures

Programming

Lists,
Dictionaries

Python, Loops

YouTube
Embed

□ PHASE 5: FUTURE MONETIZATION WITH WOOCOMMERCE

□ 9. (Optional) SELL PRODUCTS OR COURSES

Later, you can:

- Install **WooCommerce**
- Use **JetWooBuilder** to customize product display
- Sell:
 - PDF notes
 - Course bundles
 - eBooks
 - Premium video tutorials

□ PHASE 6: OTHER RECOMMENDATIONS

□ 10. IMPROVE UX

- **Breadcrumbs** – JetBlocks
 - **Table of Contents** – Add sticky index on long posts
 - **Progress Tracker** – Via LearnDash or Tutor LMS (if expanding into full LMS)
 - **Blog Section** – For quick tips, industry news
 - **Newsletter Signup** – Mailchimp or FluentCRM
 - **Performance** – Use WP Rocket or LiteSpeed Cache
-

□ FINAL CHECKLIST

Task	Status
Set up CPT Courses	☐
Add hierarchical taxonomy Course Category	☐
Add flat taxonomy Tags	☐
Create meta fields (YouTube, Resources, etc.)	☐
Design single course template	☐
Build listing grid with filters	☐

Add first 5 sample courses ☐

Embed YouTube videos dynamically ☐

Plan WooCommerce for future ☐

Would you like me to prepare:

- A **JSON export template** (JetEngine CPT + Taxonomy config)?
- A **Notion or Excel planner** for course content?
- Starter content for 5–10 course examples?

Let me know and I'll generate them for you.
